Trip Narrative/Comments (about skills and conditioning of students):

Since there was new snow on the trail from about 4000 ft and quite a bit of snow on the summit rocks, we traveled very carefully to the summit. Both students were aware of the situation and traveled accordingly. Both and were fairly sure-footed, had good balance and coped well with the slick conditions and unsure footing. is doing well with exposure and seemed relaxed and cheerful. It was a great little scramble.
