Trip Narrative/Comments (about skills and conditioning of students):

This is an easy scramble, just stay on Pacific Crest Trail for 5 miles & @ 4900' as the trail opens up into a wide hill side Kendall Peak is on the left side of a ridge. Look for a route to saddle w/ a dead tree laying on the ground, about 1/3 the way to ridge line bear left and traverse around to the SSW side of Peak where there is an easy heather slope to the summit.

This appears to be a nice R or S-2 scramble w/out any navigation problems. Good scramble for a new leader to begin leading on.
