WEATHER CONDITIONS: Great

ACCIDENT INVOLVED: NO YES (SUBMIT ACCIDENT REPORT)

TRIP NARRATION: North Ridge is very easy-- actual scramble is maybe 500 ft elevation on rock/heather. Note Becky's says to leave the trail at the first switchback after the long N. traverse. While that puts you on the correct line, it just crosses the trail again. Suggest staying on the PCT until you get to the place where Becky's route would cross it again. South ridge is much steeper and rock is not so good. R2 and R3 sections can be found.

CONTINUE ON BACK IF NECESSARY
