ENJOYED TRIP

COMMENTS NOTED BELOW

ACCIDENT INVOLVED: NO YES (SUBMIT ACCIDENT REPORT)

TRIP NARRATION/COMMENTS (ABOUT CONDITIONING AND SKILLS WHEN INADEQUATE):

We had a good pace with three or four drinkbreaks to the saddle. On the south shoulder we went from snow-patch to snow-patch getting good snowpractice in all the skills. With it being a group of students I was impressed by their endurance. We took a long break on the summit trying to identify all the other peaks. On the descent standing, sitting and vegetable glissades were practiced. The _____ did not feel comfortable on all the runs. The runouts were either rocks or trees. All in all it was enjoyable and a good experience.
